

ATHARVA JOSHI

MERN Stack Developer

📞 9665186669 ✉ atharvaj2160@gmail.com 🔗 <https://arj-portfolio-v2.vercel.app> 📍 Pune

SUMMARY

I'm a MERN Stack Developer who loves creating aesthetically pleasing front-ends. Currently, I'm focused on building my logic to the next level in basic Javascript. I aim to explore new and obscure languages like Haskell, GraphQL, Solidity, and Prisma.

EXPERIENCE

Associate React Developer (Full-time)

Apptware 📅 05/2022 - Ongoing 📍 Pune

- Developed reusable functional components using React Typescript and storybook.
- Debugged and modified functional components to repurpose them according to specific use-cases which saved 3-4 hours of coding.
- Tested E2E components and modified tests according to their workflow after UI updation using Cypress, which saved 4-5 hours of manual testing.

React Developer Trainee (Intern)

Apptware 📅 02/2022 - 04/2022 📍 Pune

- Debugged an e-commerce website and a web app and resolved most bugs within two months.
- Collaborated with a team of React Developers to resolve bugs with cart functionality, customer profiles, authentication, pricing, and taxation systems on an e-commerce website
- Worked on Integrating Payment gateways like GPay, Paytm, and PayU APIs and developed POCs for further projects.
- Conferred with management and development teams to prioritize client needs, resolve conflicts, and develop solutions.

Front End Developer (Freelance)

Samtej Industries LLP 📅 12/2021 - 12/2021 📍 Pune

- Coded a static React JS website for Samtej Industries, which helped bring their business online within one month.
- Re-engineered the website after four months, using NEXT JS to improve optimization and to increase SEO rankings in Google searches.
- Increased all web-vital scores to 100% and increased SEO ranking from the 4th page to the top 5 of the first page.

PROJECTS

Redux Authentication System

📅 11/2021 - 12/2021

Short summary of your work

- Designed an Authentication System that stores user sign-up and sign-in information in the central redux store and cross-checks the credentials with the sign-up state every time a user logs in.
- Added MD5 Hashing to secure the passwords.

Lusion Clone

📅 01/2022 - 01/2022

Short summary of your work

- Created an emulation of the "Lusion" website using React JS and Tailwind CSS. Integrated Stripe Payments API using express to enable payments.
